

DODGE Turbo Diesel Truck

- Decal installs on the outside of the windshield.
- Thoroughly clean the surface where you will be applying the decal. Note: The surface should be cool to the touch before applying.
- Pull the backing off of the decal.
- Mist the decal and surface with a fine spray of water (this allows you to make minor placement adjustments).
- Apply the decal to the desired surface.
- Using a credit card or squeegee, apply firm pressure and the water will move out from under the decal.
- Carefully peel away the transfer tape.
- Allow surface to dry for approximately three hours before driving the vehicle.
